■ Invitation for MWC 2019.

From pixel to product

At MWC 2019 pmd and Infineon will bring 3D depth-sensing to the next level. Join us for the introduction of our new 3D imager with 7µm pixels and experience its performance and superior ambient light robustness!

We invite you to visit us at MWC 2019 to learn more about our latest developments and our breakthroughs in 3D depth sensing, including the lowest production test-time of any 3D technology on the market and a new filtering technology that improves 3D output without increasing processor overhead.

All this adds up to the achievements and maturity of our 3D technology and its proven optimization for high volume production in several smartphones and many other products like cars, AR headsets and smart home devices.

In addition to that, the latest product with our Time-of-Flight technology inside will be unveiled. Be part of it!

25-28 February 2019

Hall 6 Room 6076MR
